

FIRETEXX

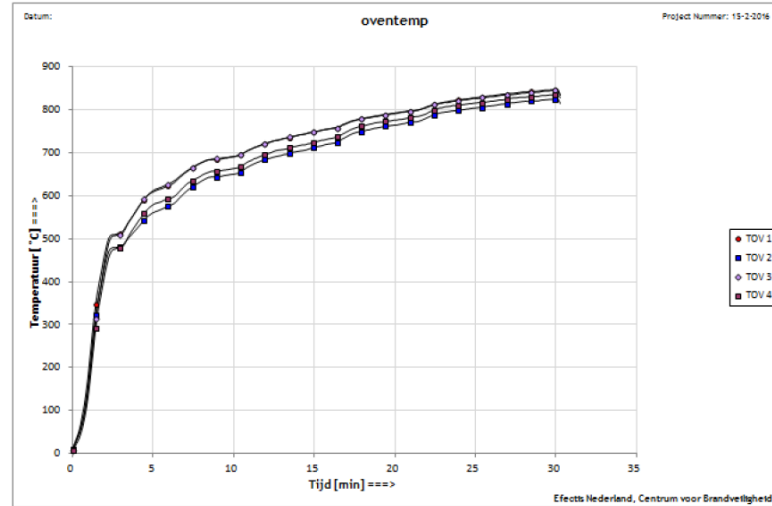

Car fire blanket TIGNIS

Firetexx

At the beginning of 2007 we launched an innovative product named the TIGNIS blanket, a fire-extinguishing blanket.

The TIGNIS blanket is not an ordinary fire-extinguishing blanket but a fire-extinguishing blanket from a fire retardant fabric that measures 6 x 9 metres for extinguishing vehicle fires. Cooling the blanket with water is not necessary but is good for the durability. By pulling the TIGNIS blanket over a car, you can extinguish a car fire in a few minutes.

The TIGNIS blanket only weighs 27 kilos and is, due to this, very compact when folded. The TIGNIS blanket is the solution especially at locations that fire-extinguishing vehicles find difficult to access. Various types and sizes can be supplied ! The material is tested over 800 degrees.
